

Claim-evidence boundary and compute accounting

a Evidence ceiling and permitted claim

S1 bounded source review May claim: route-specific source/legal/novelty disposition COMPLETED
Q0 zero-drive guard May claim: zero-drive conservation and artifact-chain guards VERIFIED
QN first driven intent May claim: frozen Newton iteration-limit failure EXECUTION_FAILED
convergence/event/thermal floors May claim: none NOT_REACHED
PINN/development/OOD/formal May claim: none NOT_STARTED
experiment May claim: none NOT_PRESENT

Ceiling: NO_ORACLE_EVENT_OR_PINN_EVIDENCE

b Gross compute accounting at hard stop

CPU solver-intent budget: 2 / 40 consumed

Recorded production solver CPU 0.0023263888888889 core-hours (freeze excluded)	Q0 execution 400 timesteps 1202 linear solves
Neural / GPU 0 forward calls 0 AD work / 0 VRAM	After failure 0 production reruns 0 rescue attempts
Unused budget is not evidence; the frozen hard gate ended the route.
