

Headline evidence replicates across sampling streams, without a positive PINN method

A. Interface exposure effect

B. Residual reduction, event collapse

C. Replicated claim boundary

Interface sign	3/3 positive
Interface quality	2/3 preserved
Forgetting residual gate	2/3 pass
Event collapse	3/3
Field-event Pareto	0/3

Streams 17/23/29 vary materialized sampling only; they are not independent model-initialization seeds.
